EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Cathy Ding on August 23, 2005.

The application has been amended as follows:

Claim 1, line 2, insert "a" before "vacuum".

The following is an examiner's statement of reasons for allowance:

Claims 1-10 are allowable over the prior art of record because the prior art of record does not teach a plurality of cathodes attached to the cathode holder, a trigger electrode for arc ignition, a trigger drive unit for performing an operation to change over a position of the trigger electrode to thereby position the trigger electrode in front of a desired one of the plurality of cathodes and an operation to move the trigger electrode toward or to get apart from the desired cathode in the position, a shutter capable of covering fronts of all of the cathodes except the desired cathode, and a shutter capable of covering fronts of all of the cathodes except the desired cathode, and a shutter drive unit for performing an operation to move the shutter to thereby change over a cathode not covered with the shutter; an arc power supply connected between the cathode of the arc evaporation source and an anode corresponding to the cathode with the cathode on a negative side; and a changeover control unit for making a changeover

control to control the shutter drive unit and the trigger unit so as to change over a cathode not covered with the shutter while positioning the trigger electrode in front of the cathode not covered with the shutter.

The closest prior art to Snaper et al. (US Pat. 5,254,237) and Vetter et al. (U.S. Pat. 5,294,322) while showing multiple cathodes fails to show among other things the trigger drive unit, the shutter and changeover control unit of Applicant's claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rodney G. McDonald whose telephone number is 571-272-1340. The examiner can normally be reached on M- Th with Every other Friday off.
